

CURRICULUM VITAE

PROFESSOR SANJAY CHATURVEDI

Indian national by birth (12 March 1961 at Ambala city)

Home Address: 6430, B-9, Vasant Kunj, New Delhi,

Email: sanjaychaturvedi@sau.int

I was Lala Lajpat Rai Chair Professor in Political Science at Panjab University, Chandigarh before joining South Asian University (SAU), New Delhi, as a Professor in International Relations in June 2018. I served as Dean of the Faculty of Social Sciences (FSS) from September 2018 to September 2021. I am serving my second term as the Dean, FSS with effect from 1 August 2022.

During the early 1990s, I pursued post-doctoral research on ‘Polar Regions in International Relations’ at the University of Cambridge, England, with a Nehru Centenary British Commonwealth Fellowship. This was followed by the award of Leverhulme Research Grant at the University of Cambridge, where I was employed as a Research Associate to work on the research project, ‘The Future of the Antarctic Treaty System and its Relevance for the Arctic’, at Scott Polar Research Institute, from 1993 to 1995. A major output of my research stint at Cambridge, which also involved lecturing to M.Phil. in Polar Studies, was *The Polar Regions: A Political Geography* (Chichester: John Wiley, 1996), which remains widely cited.

Currently, I am the President of the Indian Ocean Research Group (IORG), an *Observer* in the Indian Ocean Rim Association (IORA) and Chief Editor of its flagship journal, *Journal of the Indian Ocean Region* (Routledge). I serve/have served on editorial boards of several journals including *Geopolitics* (Routledge); *Political Geography* (Elsevier), *Cooperation and Conflict* (Sage), *Journal of Borderland Studies* (Routledge), *Strategic Analysis* (Routledge), *The Polar Journal* (Routledge, as a Regional Editor) *India Quarterly: A Journal of International Affairs* (Sage), *Indian Foreign Affairs Journal: A Quarterly of the Association of Indian Diplomats* (Prints Publication), *Journal of Global Faultlines* (Pluto) and *Journal of Land Ports and Border Economy* (Sage).

I have authored two, co-authored three and co-edited eight books under the imprint of Palgrave Macmillan, Springer, Routledge, John Wiley and Sage. Elected as the co-chair of the *Research Committee on Political and Cultural Geography* (RC 15) of the International Political Science Association (IPSA) for two terms (2006-2009; 2009-2012), I also served on the Steering Committee of the IGU *Commission on Political Geography* from 2004 to 2012. I have served as a member of the Indian delegation to several Antarctic Treaty Consultative Meetings (ATCMs): 44th ATCM (Berlin, 2022); 43rd ATCM (Paris, 2021); 38th

ATCM (Sofia, 2015); 34th ATCM (Buenos Aires); 33rd ATCM (Punta-de-Este); 32nd ATCM (Baltimore); 31st ATCM (Kiev); and 30th ATCM (New Delhi, 2007).

I have visited 51 countries in connection with various academic assignments. I am the recipient of several visiting professorships and fellowships abroad including Curtin University, Australia; University of Wurzburg, Germany under 'A New Passage to India' of DAAD; India-China Institute, The New School, USA; The University of Adelaide, Australia; University of Durham, UK; and ISEAS Yusof Ishak Institute, Singapore. I also speak/have spoken at the National Defense College, New Delhi; Sushma Swaraj Institute of Foreign Service, New Delhi; George C. Marshall European Centre for Security Studies, Germany; National Defense College, Sultanate of Oman, Muscat; and Theresa Military Academy, Wiener Neustadt, Austria. I also speak/have spoken at the National Defense College, New Delhi; Sushma Swaraj Institute of Foreign Service, New Delhi; George C. Marshall European Centre for Security Studies, Germany; National Defense College, Sultanate of Oman, Muscat; and Theresa Military Academy, Wiener Neustadt, Austria.

I was the **Lead Author** for *Chapter 10: (Asia)* of the Working Group II Contribution to the IPCC Sixth Assessment Report (2019-2021).

XXII. Excerpts from Book Reviews

1. **Sanjay Chaturvedi and Timothy Doyle**, *Climate Terror: A Critical Geopolitics of Climate Change*, New York: Palgrave Macmillan, 2015.

Giovanni Bettini (Lancaster University, UK) in *Progress in Human Geography* (Sage): “*Climate Terror* offers an invaluable contribution because it combines and fully develops a number of important critical angles –there are not many books doing that if any at all. The book will represent an important resource for critical scholars approaching the field of climate politics, as well as a necessary starting point for those working on and towards decolonized and progressive climate politics.”

Carl Death (University of Manchester, Manchester, UK) *Social Movement Studies: Journal of Social, Cultural and Political Protest* (Routledge): “*Climate Terror* is a frenetic, impassioned, angry book, from the denunciation of ‘historically perpetuated environmental injustices by the powers that be’ on the first page to the ‘Armageddon’ of the ‘the globally peripheral peoples of the global South’ on the last...the authors manage to craft a largely coherent account of many violences done by the rise of a *Climate Terror Industry*, and the great value of this book is both its scope and range, combined with writing from the perspective of the Global South with an orientation towards forces of subaltern resistance. Despite the many allusions to diverse concepts and theorists the book manages to be relatively accessible as well as challenging, and researchers new to the fields of climate geopolitics or political ecology will find a range of

provocative lines of enquiry.”

Simon Dalby (Wilfrid Laurier University, Waterloo, Ontario, Canada) in *Geopolitics* (Routledge): “Chaturvedi and Doyle offer a much-needed reminder to those concerned to think about climate in global terms that the politics of discourse matters. Geographical contextualisations are key to this process, hence their subtitle explicitly invoking critical geopolitics... Their concern is that subalterns in the Global South have their lives directly interconnected with matters of ecological injustice and vulnerabilities in ways often distant from the geopolitical narratives of Northern technocrats.”

Barry J. Ryan (Keele University, UK) in *Capital & Class* (Sage): “In this book, Chaturvedi and Doyle venture deep into strategies of hegemony and resistance to explore how the biographies of place and culture are contesting formations of globalization predicated on a hollow empathy of environmental concern. The journey they take exposes the reader to the great dangers posed to the cultures and economies of southern states by solutions that emerge from a universalist, market-oriented, post-political and militarized dogma. Seeking to underline the inherent violence it contains, the authors have termed this conservative environmentalism ‘climate terror’.”

Sasanka Perera (Department of Sociology, South Asian University, New Delhi) in *India Quarterly: A Journal of International Affairs* (Sage): “Through the eight chapters of their book, Chaturvedi and Doyle have weaved a master narrative on how climate change transpires in the wake of global warming and where these processes and politics might lead, without the rhetoric and the noise of fear, but with evidence as available and theoretical postulation as necessary...what Chaturvedi and Doyle have attempted to do is to provide a script for both the history of climate change, as we understand it now and possibilities for the future, if reasonable people might be able to capture the momentum.”

Matthew Sparke (Politics Department, the University of California, Santa Cruz) in *Space and Polity* (Routledge): “As creative as it is critical, this innovative enquiry into the geopolitics of climate change is also at once discomfiting and disorienting... As interdisciplinary as they are international in their approach, Chaturvedi and Doyle develop their international relations interventions in a way that draws as much on political geography as it does on political science and political theory... the book avoids the theoretical pitfalls of partitioning geopolitics and geoeconomics into distinct eras or spaces, and instead contributes important new evidence about their co-generational dialectics as entangled geostrategic discourses.”

Siddhartha Mallavarapu (School of International Studies, Jawaharlal Nehru University, New Delhi) in *The Wire*: “When two scholars wearing critical geopolitics lenses turn their gaze on the issues related to climate change – genesis, structures, actors, processes, concepts and practices – what results is an insightful volume that demystifies much of how the subject is spoken about... Few social scientists have bothered to engage with the science of climate change closely, even if they have accepted the challenges that it brings to the sphere of social sciences. Chaturvedi and Doyle are an exception here and the effort also provides a good model for those interested in stimulating a conversation between the social and natural sciences.”

2. **Shikui Dong and Jayanta Bandyopadhyay and Sanjay Chaturvedi (eds.)** *Environmental Sustainability from Himalaya to the Ocean: Struggles and Innovations in China and India*, Springer, 2017.

Nilanjan Ghosh (senior fellow at the Observer Research Foundation and chief economic adviser at WWF India) in *Journal of the Indian Ocean Region* (Routledge): The current book under review...marks one of the seminal attempts through collaborative efforts by Chinese and Indian scholars to report on critical issues of environmentalism in its various hues in the context of the two Himalayan neighbours. Chapter 8 by Sanjay Chaturvedi is an important cornerstone of this volume. The chapter is a refreshing change from the modes of thinking presented in the other chapters of the volume. With the case studies of the Indian Sundarbans Delta (the largest single tract mangrove forest of the world) in the Bay of Bengal and Zhangjiangkou Mangrove Forestry National Nature Reserve in Yunxiao county of Fujian province of China, the chapter reveals how communities located on sites characterized by multiple marginalities (geographical, socioeconomic, and cultural) perceive and approach impacts of environmental unsustainability and incremental climate change in both material-physical and ideational-representational terms....More importantly, this chapter, for the first time, highlights the roles of micro-geopolitics and the broader concern of social justice as embedded in the struggles and innovations.”

3. **Sanjay Chaturvedi**, *Polar Regions: A Political Geography* (Chichester: John Wiley & Sons, 1996).

Barun De (Maulana Abul Kalam Azad Institute of Asian Studies, Kolkata) in *The Telegraph*: “A remarkable book by Sanjay Chaturvedi presents alternatives for indigenous peoples and endangered species of the polar regions through theoretical rethinking, environmental, geo-historical and international legal disciplines.”

Klaus Dodds (Professor of Geopolitics, Royal Holloway, University of London) in *Political Geography* (Elsevier): “...a welcome addition to the literature on regional geography and critical geopolitics. It is *tour de force* in the sense that it is a powerful synthesis of the developmental, environmental, geopolitical, technological, political and scientific factors that have shaped the histories of the Arctic and Antarctic.”

G. O Tuathail (Virginia University, USA) in *Progress in Human Geography* (Sage): ...uses critical geopolitics to powerful effect in its analysis of the geohistory of the Arctic and Antarctic. The book is an impressive synthesis which mixes the environmental and the cultural, the political and the techno-scientific, the geopolitical and the developmental.”

Martin Ira Glassner (Southern Connecticut State University) in *Choice: Current Reviews for Academic Libraries*: “This very fine book is comprehensive and scholarly, yet unusually well written.”

David Sugden in *The Geographical Journal* (Royal Geographical Society): This is a fine book. It is rich in detail and provides an invaluable and authoritative account of the intricacies of Antarctic diplomacy and also of the variety, history and significance of the various political movements in the Arctic. It has a bold and thought-provoking theme, which adds insight into activities in the Polar Regions today. *Above all, it succeeds in bringing the Polar Regions into*

mainstream social science. No longer the Polar Regions are exotic peripheries; indeed they carry lessons that are vital to us all.
